

About me

Hi! I'm Tam Tran, a Data Visualization Analyst and aspiring Data Scientist currently pursuing a B.S. in Data Science with a minor in Statistics and a Cloud Computing certificate at BYU-Idaho.

I'm passionate about transforming data into meaningful insights and compelling visual stories that drive informed decisions. With hands-on experience in Python, SQL, R, Power BI, Tableau, and DAX, I enjoy working at the intersection of statistics, analytics, and communication.

My academic and professional journey has sharpened my ability to analyze complex data, think critically, and collaborate across teams. I'm also an active contributor to the data science community at BYU-Idaho, mentoring peers and leading project-based learning.

I'm excited to keep growing in data science and contribute to innovative, data-driven teams solving real-world challenges.

Education

Brigham Young University - Idaho / Expected Graduation: December 2027

Bachelor of Science in Data Science

Minor in Statistics & Cloud Computing Certificate

Key skills

- Data Analysis: Python (Pandas, NumPy, Matplotlib, LetsPlot, Seaborn, Scikit-learn), SQL, R
- Machine Learning: Data preprocessing (train-test split, feature engineering, encoding categorical data), Classification Models (Decision Trees, Random Forest, KNN, XGBoost), Regression Models
- Business Intelligence Tools: PowerBI, Tableau
- Microsoft Office Suite: Word, Excel, PowerPoint, Outlook
